Contents Volume 74

Contents

Special Issue: Automated Component-Based Software Engineering

Automated Component-Based Software Engineering
I. Crnkovic, H.W. Schmidt, J. Stafford and K. Wallnau 1

Deployed software component testing using dynamic validation agents
J. Grundy, G. Ding and J. Hosking 5

Towards automatic monitoring of component-based software systems
M. Zulkernine and R. Seviora 15

A data-centric approach to composing embedded, real-time software components
R. Wuyts, S. Ducasse and O. Nierstrasz 25

Performance prediction of component-based applications
S. Chen, Y. Liu, I. Gorton and A. Liu 35

A formal approach to component adaptation
A. Bracciali, A. Brogi and C. Canal 45

"Computer, please, tell me what I have to do...": an approach to agent-aided application composition
M.R. Campo, J. Andrés Díaz Pace and F.U. Trilnik 55

Automated support for service-based software development and integration
G.C. Gannod, S.V. Mudiam and T.E. Lindquist 65

Regular papers

A formal software requirements specification method for digital nuclear plant protection systems
J. Yoo, T. Kim, S. Cha, J.-S. Lee and H. Seong Son 73

Some successful approaches to software reliability modeling in industry
D.R. Jeske and X. Zhang 85

Software requirement understanding using Pathfinder networks: discovering and evaluating mental models
U.K. Kudikyala and R.B. Vaughn 101

Special Issue: The new context for software engineering education and training

The new context for software engineering education and training
H. Saiedian and B.W. Weide 109

Developing and using a web-based project process throughout the software engineering curriculum
D.J. Bagert and S.A. Mengel 113

eXtreme Programming—helpful or harmful in educating undergraduates?
J.-G. Schneider and L. Johnston 121

Teaching extreme programming to large groups of students
G. Hedin, L. Bendix and B. Magnusson 133

doi:10.1016/S0164-1212(04)00161-X

Integrating formalism into undergraduate software engineering
P. Alexander 147

Regular papers
A maturity model for the implementation of software process improvement: an empirical study
M. Niazi, D. Wilson and D. Zowghi 155

Product derivation in software product families: a case study
S. Deelstra, M. Sinnema and J. Bosch 173

Modification of standard Function Point complexity weights system
M.A. Al-Hajri, A.A. Abdul Ghani, M.N. Sulaiman and M.H. Selamat 195

Characterizing a data model for software measurement
L. Chirinos, F. Losavio and J. Bøegh 207

Erratum to "An empirical study of maintenance and development estimation accuracy" [The Journal of Systems and Software 64 (2002) 57–77]
B. Kitchenham, S. Lawrence Pfleeger, B. McColl and S. Eagan 227

ECEM: an event correlation based event manager for an I/O-intensive application
S.S. Lim and K.H. Park 229

Measurement-based end to end latency performance prediction for SLA verification
C.M. Leung and J.A. Schormans 243

Simulating autonomous agents in augmented reality
E. Gelenbe, K. Hussain and V. Kaptan 255

An empirical study of system design instability metric and design evolution in an agile software process
M. Alshayeb and W. Li 269

Software failure prediction based on a Markov Bayesian network model
C.G. Bai, Q.P. Hu, M. Xie and S.H. Ng 275

Static and dynamic distance metrics for feature-based code analysis
W.E. Wong and S. Gokhale 283

On the security of some proxy blind signature schemes
H.-M. Sun, B.-T. Hsieh and S.-M. Tseng 297

Improving the performance of client Web object retrieval
A.P. Pons 303

Adaptive index management for future location-based queries
H.K. Park, J.H. Son and M.H. Kim 313

An investigation of software engineering curricula
B. Kitchenham, D. Budgen, P. Brereton and P. Woodall 325

Contents Volume 74 337
